

Clarke County
School District
Better Together

Our mission is to improve student achievement, productivity, independence and inclusion by enhancing access and knowledge of assistive technology and increasing student performance in their curriculum and communication using appropriate assistive technology solutions.

Assistive technology is any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability.

For questions regarding assistive technology needs for your student, please contact the Special Education Team Leader at your child's school for assistance.
